CITY OF BELOIT, WISC. STP - Rockton Township
Illinois Sludge Management Plan

City of Beloit
Wastewater Treatment Plant
101 Water St.
Beloit, WI 53511

ATTENTION: Rick Adamaki, Sludge Management Supervisor

Dear Rick:

This letter will confirm the phone conversation you had on the afternoon of December 1, 1982 with Charles E. Corley of this office concerning complaints from residents in Rockton Township.

You reported the application of 128,000 gallons of Beloit, Wisconsin sludge to the A. Bauling Farm on Monday and Tuesday of this week and 127,000 gallons on November 22 and 23, 1982 (last week). We would like to remind you of the Special Condition 1, A.i. and A.iii. of your Sludge Utilization Permit issued by this Agency dated February 19, 1981. Due to the generally wet weather condition of the past two weeks, the application of sludge during these days may have been in violation of the permit conditions. In addition, applying sludge during wet weather seems to have unnecessarily antagonized area residents. The permit further authorized only 45,000 gallons per day of application.

Because of the above practice we are asking that you review and strictly adhere to all the conditions of your Sludge Utilization Permit especially the two cited above. You risk losing the permit if special conditions on the issued permit are violated.

they are
monitoring -

EPA Region 5 Records Ctr.

300579

With reference to sludge application records that you have been sending to this office, it is our request that you consider sending your reports to us following the month after application. The sludge analysis result must include analytical results for Volatile Suspended Solids and Volatile Acids.

If you have any questions concerning the contents of this letter, please feel free to call me or Charles E. Corley at 815/987-7755.

Sincerely,

DIVISION OF WATER POLLUTION CONTROL
